FYTOGREEN’S Green Façade System

KEY BENEFITS OF A GREEN FAÇADE

- Reduce Building A/C Energy Costs
- Reduce reflective Light & Heat
- Cost Effective
- Minimal Equipment Access Requirements

Fytogreen creates beautiful external green facades using web mesh, cables and square mesh to train climbing plants and shrubs to cover buildings and walls.

These popular lightweight green facades offer benefits for amenity and thermal influence...they can reduce building temperatures and air-conditioning costs, reduce reflective light and heat and offer acoustic insulation while producing oxygen and absorbing Co2.

Fytogreen’s green facades continue to grow and the changing floral and decorative effects delight and inspire people.
